Response to Amendment

The amendment filed on January 05, 2008 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because they are directed to method for remote input/output for a processing unit, translating an input signal and processed data into audio-visual output signal and rendering the audio-visual display at a mobile input/output terminal as screen flashes using said audio-visual output signals classified in class 715 subclass 716.

Since the above-mentioned amendment appears to be a bona fide attempt to reply, applicant is given a **TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS**, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. **EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.**

Newly submitted claims 26-48 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: they are directed to method for remote input/output for a processing unit, translating an input signal and processed data into audio-visual output signal and rendering the audio-visual display at a mobile input/output

terminal as screen flashes using said audio-visual output signals classified in class 715 subclass 716.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 26-48 are withdrawn from consideration as being directed to a non-elected invention.

See 37 CFR 1.142(b) and MPEP § 821.03.
